

Diagram 100 illustrates a network architecture. A central cloud contains a **ROUTE SERVER** (110) and a **VRF** (18). A **CALL CONTROL** block (200) is connected to the cloud. The cloud is connected to several **PE** (Provider Edge) routers (11, 12, 13, 14, 15) and **R** (Router) components (16). External connections include **CE** (Customer Edge) routers (21, 22, 23, 24, 25, 26, 27, 28) and **H** (Host) devices (31, 32, 33, 34, 35) connected to the **PE** and **R** components.
